EXPERIENCE

Junior Software Engineer

Rihal July 2026 – Present | Muscat, Oman

- Currently onboarding and building hands-on proficiency in Golang, the Echo framework, SQLc, WSL, Docker, and Keycloak.
- Preparing to contribute to MEM project by deepening knowledge of Go-based web services, database code generation, containerization, and identity and access management tools.

Junior Software Developer

Telecommunications Regulatory Authority September 2024 – June 2026 | Muscat, Oman

- Develop and maintain full-stack enterprise applications using Java, Spring Boot, Angular, TypeScript, and SQL Server within a collaborative Agile development environment.
- Apply object-oriented programming principles, software design patterns, and coding standards to deliver scalable, maintainable, and secure software solutions.
- Design and consume RESTful APIs, supporting system integration and efficient data exchange across internal platforms and services.
- Collaborate with business stakeholders, analysts, and development teams to translate functional requirements into technical solutions aligned with organizational objectives.
- Participate in application testing, debugging, code reviews, and performance optimization activities to ensure software quality and reliability.

PROJECTS

Mada Platform

- Contributed throughout the software development lifecycle, participating in requirements gathering, database schema design, backend API development, and frontend implementation.
- Developed and enhanced enterprise modules for asset management, ticketing, and software license tracking, supporting operational workflows across multiple departments.
- Designed and implemented RESTful APIs and relational database structures to facilitate efficient data management and seamless integration between application layers.
- Developed responsive user interfaces using Angular and TypeScript, leveraging Angular libraries and reusable components to improve usability and streamline employee access to centralized organizational services.

Legal Affairs System

- Contributed to the development of a secure web-based system for managing telecom-related legal cases, including inspection reports, violations, and citations.
- Assisted in implementing structured data models for legal references, statements, and regulatory provisions to support compliance with telecommunications regulations.
- Collaborated with cross-functional teams to support a digital dispute resolution workflow, enabling telecom operators to submit, track, and manage case resolutions efficiently.

Asteroid Tracker

- Developed a Spring Boot web application that retrieves and displays real-time asteroid data from NASA APIs, enabling users to track near-Earth objects by size, speed, and proximity.
- Implemented dynamic filtering and visualization features to highlight potentially hazardous asteroids, closest approaches, and high-velocity objects, improving data interpretation and analysis.

EDUCATION

German University of Technology in Oman --- Bachelor of Science (BSc) in Computer Science

2019-2024 Graduation Date: June 2024

- GPA: 3.4/4.0

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate Issued in October 2025

Credential ID: 322902040OCI25AICFA

AWARDS & HONORS

Dean's List

German University of Technology in Oman

- Winter semester 2020.
- Top 10% of the class

SKILLS

Technical Skills: JavaScript (Basics), TypeScript, Java, SQL, HTML, CSS, RESTful APIs, UI/UX Design

Tools & Frameworks: Spring Boot, Angular, MS SQL Server, Git (Version Control), Strapi, Postman, Figma, Streamlit, Django, Next.js.

Soft Skills: Teamwork, Communication, Leadership, Time Management, Adaptability, Research, Creativity, Precision.
